The Herald and News Heading

Appears at last. We hope it will please the eye of the reader. We take this occasion to thank our friends and the entire State Piess for the many kind and complimentary words they have seen fit to give us. The Newberry HERALD AND NEWS now throws its bunner to the breeze. The pleasant relations now existing may we strive to cement and make lasting.

\$10,000 Damages.

Horace Edwin Bruce, a merchant of Columbia, is being sued for \$10,000 lamages by W. B. McDaniel, for slandering the good name of his wife. Mr. McDaniel has since saed Albert E. Fugle also for \$10,000 for defaming Mrs. McDaniel's character.

Our worthy friend and brother, Mc-Sweeny, is excused for oversight in acknowledging a fifteen line local to the HERALD AND NEWS. The reason for the oversight we suppose is that his rockets are so filled with candidates' fees as to cause mental blind-

A Runaway in the Country.

On Sinday last a mule ran away with a buggy containing Miss Janie Chalmer:, of Jalapa, and Miss L'zzie Copeland, of Clinton. The male ran about a hundred yards and turned off into the woods, breaking loose from the buggy. Miss Copeland had her ankle sprained.

Scientific Agriculture.

In our agricultural column appears a piece on how to cushion baby carringes. How the printer got it there we are at a loss to understand. The only way we can account for it is, he must have been thinking of farm, garden and household, and was led away by the reflection that "a matrimonial fruit-basket" is a necessary adjunct. And every farmer knows that cradles are indispensible in the harvesting of

A Negro Shoots Another. Last Friday evening a difficulty occurred between John Cannon, living on Mr. Henry Koon's Kinard place, and Henrz Sligh, who lives on Mr. T. B. Chalmers' place. From what we are told by a gentleman who knows the parties it appears that Cannon's wife was away from home on his return from Newberry and he met her at Sligh's house, when he somewhat chastised her. Sligh told him he was a difficulty then occurred between the two men, in which Cannon got the worst of it. Cannon thereupon left, but returned with a gun and shot is doing well.

Pardoned.

Robert Gallman, a young negro about 21 years, old, was convicted of fornication at the last March term of court for Newberry County, and sentenced by Judge Fraser to imprisonment in the penitentiary for a months. He has been pardoned by Governor Thompson, after having served four months of his sentence. The petition for his pardon was signed by leading citizens of Newberry, including several of the county officers, as he was convicted upon the testimony of a woman of bad character, and it also having been proved at his trial that Gallman's character was more than ordinarily good for one of his race. The Judge and Solicitor recommended his on. Gallman was represented by Hunt. Jr.

A Salutatory.

With the advent of our new heading the local thinks it an appropriate time to utter a few words, or forever herejoined together let no man put asunder. Men, women and children desire something new under the sun. Next Generation.

We dislike to publish the following, but think it only fair that the girls of the next generation should know how the thing is going to work. The girls of the present period are all right: A Philadelphia magazine makes the statement that marriage is on the deerease, and it predicts that every twentieth girl of the next generation will be obliged to live an old maid.

The Columbia Register says that Col. R. C. Watts of Laurens states that papers have been filed in the office of the Clerk of the Court of Laurens County, in the case of Martha Eliza Burdett against Wm. H. The plaintiff has recently become a mother. She is represented by Messrs. Ball & Watts. The case has excited deep interest, and Col. Watts says will be a lively trial.

Some Snakes.

Rev. A. J. Stokes, of pleasant Newberry memory, has been doing the State as well as the Church good service. As Presiding Elder of the Sumter District, and while on his rounds, he killed a huge moccasin, a post mortem examination of the monster bringing to light forty young moccasins, each about seven inches in length. They were enclosed in separate sacks, showing that all snakes do not propagate by egg:. We have heard of a chariot drawn by forty grey horses, but never of forty young snakes in this way. Nevertheless we do not doubt the story in the least.

is She Wild? Last Friday one of the laborers on Judge J. B. Fellers' place, four miles from town, saw a white woman, apparently about 40 years old, hanging out her clothes to dry on some bushes in one of the fields. He could get no satisfaction from her. In answer to his question she informed him that she was not lost. It was very evident that she was a stranger to those parts. The man left her to consult with others. On returning, it was found that she had gone, but not far, as she was seen sitting near a drain, eating. She was again left to her solitude, with none to molest or make her afrail as she enjoyed her frugal meal, and Judge Fellers was informed of the state of affairs, and his legal counsel taking the law in his own hands, and asked as to a settlement of the difficulty, The Judge didn't think it necessary to take out letters on her estate, said that she must be made to go -not stand on the order of her going Sligh in the knee. Red Hair, Mosquitoes and Bustles. The local editor of the HERALD AND NEWS started out to pick up items. Editorial matter and selections and clippings he was not after. He was in search of original, pungent paragraphs for the people-local news, for locals they must have, whether anything of Jalapa, has met with the misfortune happens or not. The Asiatic cholera of having his safe robbed of a large may rage and spread, and investiga-tions prove that the Arctic explorers longed to Mrs. S. E. Kinard. ate the flesh of the dead; France may put on her war paint and pull China's oig pig-tail and make the heathen rage all samee like Melican man; the anti-Jewish riots may continue in Yekatarinosta, Southern Russia, and attempts be made to seal up the German colony at Angra Pequena, in Africa; the relief of Khartoum may perplex and worry others besides the inhabitants of Wady Halfa and Suakim and at Lynchburg, S. C. Keah and Kasseir and so forth; plague, pestilence and famine, battle and murder may range from the gilded palaces and Oriental splendour of the East to the dark jungles and dirty mud hovels of the far West, where for long, lost centuries the star of empire has been taking its course; slander and scandal may continue to be the leading question in the Presidential lished elsewhere, stating that he race and Ben Butler try to get his revenge in Cleveland's defeat; anti-prohibition may swell one-half of the scribes to the HERALD AND NEWS. country and spirits dwell in the other. while baseball and gnats predominate in Newberry, and the heat be strong enough to run the phosphate royalty through the State University into the Columbia Canal; the big injun may whoop and dance on the wild prairie and kick up as much noise as the boys who voted for Sligh, Pope, Schumpert and Hardy; the telegraph and able may continue daily to send the electric flash of intelligence and flood he countries with news, circling the nemispheres, as to what is transpiring; sixty-seven persons may die each minute, while seventy are born, according to a European newspaper's calculation; the earth may quake and oceans roar and stars and planets engage the astronomer's eye; all this and more, may go on from day to day, but local news must be found. But what has this to do with red hair, mosquitoes and bustles? Nothing, only, as said before, we started out local hunting, and found game scarce. There was lull in the streets, with an occasional in a branch or from a spring. Parties lullaby in the houses. Not a leaf who suffered for years have been enstirred; you know the balance-but that is old. Well, knowing the average Newberrian's desire for news, not manufactured but genuine, we fanned the dad-blamed gnats away, wiped the perspiration from our face, pulled our vest away from our suspenders anddid the same thing over again. How-ever, we succeeded in picking up a few lots, caught on the fly here and there, which can be found in other columns.

On our return we came across the information that natural red hair is worth from \$18 to \$20 per ounce; that mosquito always kisses a pretty girl before he bites her; and that a married ady heard a young lady say she had evey newspaper in the State in her bustle except the Christian Advocate, and when she got idle she just reached

It is astonishing how green some people are when they first try to talk through the telephone. A fellow in this town, after answering one of the offices, didn't know how to "get loose" from the phone. He rang the bell, thinking that would be sufficient, and was turning away, when he was surprised to hear a voice say: "Well, who are you? what do you want?" He didn't know what office he had rung up, but thought it was the central. Not knowing what else to say, he ventured to mutter. "Disconnect." It transpired through the transmitter that he wasn't talking to the central office, and it wasn't his place to ring for disconnection, anyway. He thinks he heard a laugh.

"Richland's" (Col. L. A. Ransom) Columbia letter to the Augusta Chronicle, of a recent date says: "Col. D. P. Duncan, President, and Col. T. W. The building will be one of the largest and handsomest of its kind in the South, and will cost between \$6,000 and \$7,000. It is a matter of great pride to South Carolinians that while the societies in other States have failed to hold their fairs regularly, the society in this State makes its annual fairs better every year, until they are pronounced by strangers equal to those held in the wealthier Western States. South Carolina is centrally located between Georgia and North Carolina, and as those States have not held regular annual fairs for some time, would it not be well for them to unite with South Carolina and hold a great inter-State exposition?'

Selfishness.

Selfishness is one of the ugliest traits of character. It is a pity that so much of it is seen. We would rather be as poor as Job's turkey and be generous and kind, than be rich as Crossus and selfish and unkind. A selfish character is despised by all good men, socially, morally or financially. He thinks only of himself, nothing of neighbor or friend; he accepts all kinds of favors and returns none. He cares not if you are well or sick, for what matters it if he is well, and his stomach is full? This is all he cares or thinks about. His house is not dedicated with the beautiful motto, "Welcome to All," simply because you are not Welcome. He would rather have your room than your company. Save us from a selfish man. He is a blot on the earth, and is not liked in his neighborhood; in short, he is unwholesome, and smells bad, and when he dies he will be laid away unlamented and for-We have no use for a selfish Peterson's Magazine For September opens with a per-

But be that as it may, John P. Sloan is dead. He had taken refuge on the on Garlington & Young's place, in there was no chance for his escape, and rather than be captured, he fell at the point of his own pistol and immediately died, having fired three times in his left breast. The jury of inquest rendered a verdiet in accordance with the above facts. The remains were brought by private conveyance through he country Wednesday and interred

in Rosemont Cemetery.

This appalling murder of a wife and suicide of a husband, is fearful to contemplate, for the double tragedy takes a prominent place in the catalogue of erime, and has cruelly wronged and orphaned a family of children, leaving them with an inheritance of bitter

and remorseless memories. It is said that the post-mortem reyealed the fact that consumption would soon enough have destroyed the

ife of Mrs. Sloan. No man can reach the awful point hat Sloan did, at once. It is by slow degrees, yielding to the tempter, that comes finally to make evil his good and commits the mortal sin. What man would imbrue his hands in the blood of the wife of his bosom and then hate his own son with mortal hatred and breathe out threatnings, until he had lost all control of himself?

O that mammon, moloch and dark passion would give place to generous and gentle thoughts and emotions that must find expression in words and acts of sympathy and forgiveness, in which the affections and not the passion; are cherished.

FLYNN

Needing MONEY!

Sôme plain talk to the Public!

\$5,000

And must be had by the **30th** day of June if goods at half price can be any inducement. We are willing to lose \$1,500 on the actual New York cost of the goods and still make money. On the first day of July we can buy a bankrupt stock of \$11,027 67-100 for \$5,000 in cash down and in that way we make our money. If this plain statement does not convince the reader a careful perusal of the feliowing prices will enlighten him and get him to thinking that a cyclone has struck Flynn's and torn it all to pieces, and now comes the thunder of our prices that is bound to carry terror to our competitors:
